

What do scientists and physicians think of religion? Aren't they incompatible? Would you be interested in learning more? The video series, Religion and Science, produced by the Wesley Ministry Network features host, Dr. Francis Collins who directs the Human Genome Institute. It includes presentations on the famous atheist

Richard Dawkins arguing that his work has been a disservice to science and religion. Other presenters look at the ethical minefield that is genetic research and explorations into the human brain. The plan is to devote 3-4 Wednesday evenings to this in the coming months. If you are interested, please sign-up or call Luci. For other questions, contact Sharon.
